

**A French Group Serving Health
and Hospitals**

A specialized French ecosystem ●

We Manage Care Int. supports the development of hospital projects by providing feasibility studies, real estate and biomedical planning studies, project management and monitoring services, as well as hospital management solutions. Thanks to our expertise and experience, we are able to design and oversee projects of all sizes, and can also contribute to their operation in line with our clients' expectations.

We also deliver **turnkey solutions** and a full range of medical equipment tailored to users' needs, along with all related project services, in close collaboration with our partners.

A French Group Serving Health and Hospitals

More than

15

**years of
experience**

Trainers	Technicians

Feasibility studies & business cases ●

Morocco (Private equity investor)

Feasibility studies & Business Case for a 12,000 m² medical, surgical, rehabilitation & reathletization Sport Clinic

- National & international market study in the field of sport medicine
- Study of the project environment and needs
- Definition of the detailed medical program and activity forecasts
- Project capacity and functional planning
- Technical program & architectural feasibility
- Biomedical equipment planning
- Investment cost identification
- Modeling of HR & other running costs
- Business plan for the first 10 years of running

Market study elaborated in collaboration with Roland Berger local office team in Morocco (Casablanca)

Côte d'Ivoire (Abidjan)

Feasibility studies and delegated project management for a 10,000 m² specialized private hospital project

- Technical feasibility studies and project business plan
- Delegated Project Management throughout the design phase (including building permit application, financial structuring, and contractor selection) and the execution phase (overseeing construction works and facility equipment installation on behalf of the project owner)

Work carried out in coordination with a West African banking and insurance group (financing of the studies), as well as with the financial advisory firm First Capital, responsible for the project's financial structuring.

Senegal - Fann public university hospital (Dakar)

Feasibility studies for a 7000 m² Western Africa reference center in vascular surgery

- Study of the project environment and needs
- Definition of the detailed medical program and activity forecasts with the local medical team
- Project capacity needs calculation
- Functional planning
- Technical program & architectural feasibility
- Biomedical equipment planning
- Investment cost identification

Work carried out for the benefit of the French NGO "La Chaîne de l'Espoir"

Principality of Monaco

Assistance to the elaboration of the Principality healthcare strategic plan

- Identification of the various work themes with Health Ministry team
- Recent developments and status report on the identified themes
- Interviews with thematic leaders within the Principality
- Collaborative definition of the main areas of vision for the future, benchmarks with other healthcare systems
- Verification of the consistency of the visions and projects with the Minister's team
- Delivery of the Principality's strategic health project

Mission carried out with the support of several of our medical experts who led the emergence of the strategic projects for the different specific streams (e.g. Prehospital medical emergency, geriatrics, rehabilitation, prevention, etc.)

Project management ●

Ile Maurice - Life Together private group

Support for the commissioning of an day-care surgery clinic

- Defining organizational and human resource needs
- Developing care protocols and procedures
- Raising awareness and training medical and nursing teams on day-care surgical procedures
- Supporting public communication
- Supporting immediate post-opening operational readjustments

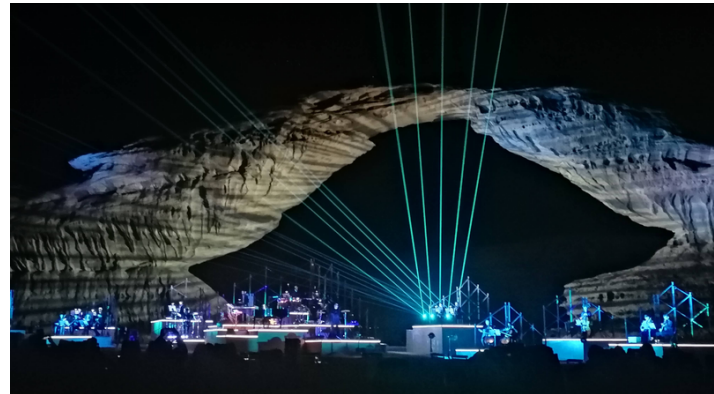

Outpatient surgery is a new activity within the Mauritian health system, so our team carried out a mission of persuasion with the teams based on scientific arguments and feedback

Mali - National Social Welfare Fund

Support for the commissioning of an out-patient diagnostic center in Bamako

- Defining organizational and human resource needs and organizations
- Developing care protocols and procedures
- Training of medical and nursing teams
- Supporting immediate post-opening operational readjustments

Kingdom of Saudi Arabia Royal Commission for AlUla (RCU)

Operational support to pre-hospital emergency medical services in the AlUla region

- Supervision of medical operations deployed during the annual festival (procedures, resources, reporting, etc.)
- Participation in medical coverage for major events through a 24/7 medical team for RCU VIPs
- Coordination of medical services dedicated to ensuring security for multiple events related to promoting tourism in the region (September - April)

Operational support provided every year since 2019, with the support of the French Agency for the Development of Al Ula (AFALULA)

Operational support ●

IRIS Healthcare Forum : twice-yearly events

Practical and interactive events

"Improving Care Pathways for Chronic Diseases"

"Optimizing the Patient's Surgical Journey"

Designed to share real-world feedback from healthcare professionals and foster discussions around your challenges, these events have achieved a consistently high level of participant satisfaction since their launch in 2008.

Action-oriented training

Tailor-made training programs, rooted in the teams' daily practice and designed to strengthen skills and optimize care pathways.

Training ●

Your tailor-made project ●

We take charge of or manage all the stages of your Project, providing a life-long expert follow-up
